A comment

My comments on proposed rule change to eliminate the mores code requirement for amateur radio license.

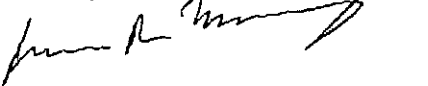

I agree with part 3 of the executive summary totally!

Please understand that I have been an electronic technician since 1957 (USAF) and dabbled with electronics for 10 years before that. I had attempted to learn Mores Code many times during those many years but to no avail. Finally when the requirement for Mores Code was dropped from the TECHNICIAN class I was able to obtain an operators license even though limited.

If the code requirement is removed I for one will proceed to obtain an advance license. Thus advancing a lifelong dream of mine, that of being able to talk around the world.

This is probable not the correct method for getting this comment into the record, but couldn't figure out how to do it. I really thank you for getting this to the correct persons.

Thank you

James R Manery
